

# BounceTogether Data Sharing Agreement

## What is BounceTogether?

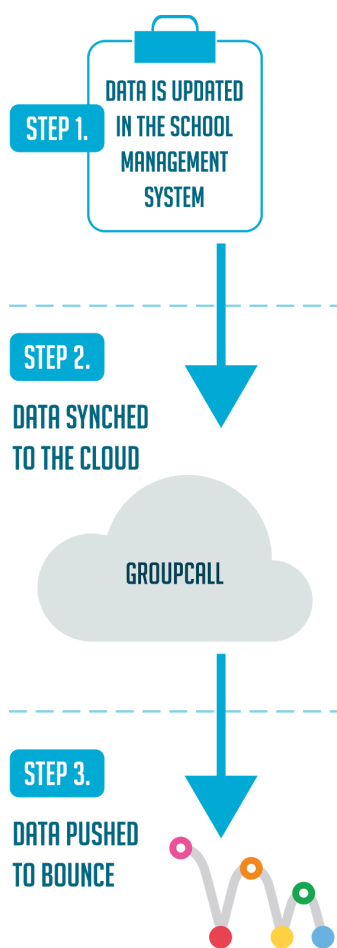

BounceTogether is a software platform that enables you to capture data through the use of an online survey that you can then use to measure performance and improvement throughout your School/Organisation.

## Document Aims

This document details the data objects and items that are shared, the use of, use by, storage and storage duration, safeguarding and security of the data that you (the customer), will share with us Bounce Together Ltd (the company) company number 11799491. This information provides a framework for our Data Sharing Agreement (DSA) with you. The DSA is an important document, which supports our joint obligation to comply with the Data Protection Act 2003 and comply with the Information Commissioner's Office (ICO) mandate. In order to use BounceTogether your organisation must understand and formally accept this agreement.

## Use of Data

The Use of Data policy is provided for schools to ensure that, as data controllers, they have the ability to share data and that they consider there to be appropriate measures in place, ensuring that the data is held securely and confidentially. This document sets out how Bounce Together Ltd supports these objectives.

Bounce Together Ltd and its suppliers will be acting as 'data processors' as defined by the 2003 Data Protection Act. Bounce Together Ltd has taken all reasonable measures to ensure the safety and security of personal information and continues to review these measures on an on-going basis.

## Data Storage

Every effort is made to ensure the data held by the BounceTogether platform is secure and our reputable hosting provider apply a variety of techniques to ensure the data is kept safe. These include but are not limited to; the premises is surrounded by 3m high fencing and 25 CCTV cameras, an electronic access control system prevents authorised access, plus the facility is manned 24/7 ensuring the network is fully protected at all times.

## Data Security

This information gives details of the management of data security in relation to the use of BounceTogether. Schools may wish to use this in conjunction with their fair use policy.

Information is extracted from the school Management Information System (MIS) using Groupcall's industry leading and secure Xporter software. The data is securely uploaded to BounceTogether using industry standard SSL encryption. A unique identifier configured by Bounce Together Ltd in Groupcall Xporter ensures that the information is linked to the correct customer account in BounceTogether. Groupcall Xporter accesses your school MIS system using credentials that you provide and cannot access it without them.

The information from your school is held inside the BounceTogether platform, which is hosted within the United Kingdom. You can find out about the security and safety policies that affect your data in more detail by contacting Bounce Together Ltd.

## Support

The technical representatives at Bounce Together Ltd are able to resolve or advise you on any technical issues that you encounter while using our products and provide first line support for Groupcall Xporter integration also. Occasionally it can be necessary for our representatives to view the issue with you, in order to diagnose it fully and offer a solution. In circumstances where this needs to be viewed remotely, they may use remote access tools to view your computer with you, in which case you should remain at your computer and supervise the entire session.

All of our remote sessions allow you to retain control and allow you to terminate the session at any time. If your issue escalates and an additional support technician is required, then they may also be invited to join the remote session. In some cases where a second line escalation is required for Groupcall Xporter software this may involve also allowing a Groupcall support technician to join the remote session.

If your issue is a platform issue or requires changes to your account configuration, then Bounce Together Ltd staff may perform such configuration on your behalf from our secure management platform without requirement for remote access. You are reminded that you should avoid sending personal information, such as student/contact records, to us directly via email. You certainly should only send such information when supported by strong encryption, if there is an explicit requirement

to do so. Bounce Together Ltd staff will advise the most secure method for transfer if there is such an explicit requirement.

## Data Life Cycle

Your data's point of origin remains in the school MIS. Changes made in the MIS are transmitted to BounceTogether via Groupcall Xporter and changes are synchronised nightly from your school MIS.

### New 'personal' records

When a new staff, student or contact record is detected in the MIS, and meets the selection criteria it will be uploaded to BounceTogether at the next transmission and appear in the user interface accordingly for authorised users.

### Changed 'personal' records

When an updated staff, student or contact record is detected in the MIS, and meets the selection criteria it will be updated in BounceTogether at the next transmission and appear in the user interface accordingly for authorised users.

### Deleted 'personal' records

When a staff, student or contact record in the MIS no longer meets the selection criteria or is deleted this stops being transmitted to BounceTogether.

When a person is detected as deleted or left, BounceTogether immediately revokes permissions for that person and retains their historic activity indefinitely to provide audit.

### New Group Memberships

When a person is detected to have a new or changed group membership, e.g. registration group, staff post, etc. this will be notified to BounceTogether on the next transfer and will then be reflected in the user interface for authorised users.

### Deleted or Ended Group Membership

When a person is detected to have left a group membership, e.g. year group, class group, etc. this will be notified to BounceTogether on the next transfer and will then be reflected in the user interface for authorised users.
